

Sino-German Agribusiness Activities at EuroTier 2016, Germany

16 - 17 November

**German experiences in organic residue
management and its relevance for China**

Draft

With support from

Federal Ministry
of Food
and Agriculture

by decision of the
German Bundestag

Dear Friends and Partners,

organic residue management is currently a top priority on the Chinese agricultural policy agenda. Hence, the Sino-German Agricultural Center (DCZ) is working on this topic within the agricultural policy dialogue.

In line with these priorities DCZ / DLG is organizing a series of events in the frame of the world-leading livestock exhibition EuroTier 2016. The aim is to discuss and demonstrate how German technology and know how can contribute to improved practices with regard to manure processing and handling in China.

Tentative schedule

Day	Activities
16.11	- Agribusiness Forum on organic residue management - Guided EuroTier and Energy Decentral visit
17.11	- Visits of best practice examples of organic residue management in Lower Saxony, Germany - Agribusiness roundtable at the Chinese exhibitor evening

Simultaneous interpretation will be provided in English and Chinese at the Agribusiness Forum
